## COANTE

Since 1985, Ermaş Mining INC., which is a world brand, has more than 500 employees, has 3 factories, 6 marble and traverten quarries with innovative, dynamic, productive, researcher, reliable identity and human and environment oriented working understanding. ERMAS; created Coante by proving his pioneering in the field of design by bringing his experience, advanced technology understanding, environmentalist and innovative identity together. Coante is the most advanced quartz-based composite plate factory of the world with a production capacity of 800.000 m<sup>2</sup>/year, working on an area of 65.000 m<sup>2</sup> with 25.000 m<sup>2</sup> closed area.

Coante countertops are produced from natural quartz, one of the hardest minerals in the world.

Compared to granite, it has great advantages against alternatives in countertop applications with stain-proof, easy scratch-free and high chemical resistance.

Another advantage of Coante is its antibacterial property, which does not allow bacteria to multiply due to its pore-free structure.
